

Shaker vs. Raised Panel Cabinets:

Side-By-Side Comparison

	Shaker Cabinets	Raised Panel Cabinets
Style	Modern and transitional	More traditional
Construction	Flat center panel recessed within a square frame	Raised center panel surrounded by decorative molding
Maintenance	Easier to clean due to the flat surface; less prone to dust collecting in grooves	May require more care to clean details and molding; dust can accumulate in raised areas
Price	Generally less expensive due to simpler design and construction	Can be slightly more expensive due to the additional material and labor
